

Technology Licensing Partnership

Subject: Technology Licensing Partnership Proposal

Dear [Technology Partner],

I am writing to propose a technology licensing partnership that would allow both our companies to leverage innovative solutions while expanding market opportunities and revenue streams.

[Your Company] has developed proprietary technology in [technology area] that addresses critical challenges in [industry/application]. We believe your company's market position and customer relationships make you an ideal partner for commercializing this technology through a licensing agreement.

Our technology offers [key benefits and differentiators] and has been validated through [proof points: testing, pilot programs, customer feedback]. The market opportunity for this technology is substantial, with projected market size of [amount] and growing demand driven by [market drivers]. We are proposing a licensing agreement that would grant you [exclusive/non-exclusive] rights to [specific applications/territories] in exchange for licensing fees, royalty payments, and minimum performance commitments. The financial structure we envision includes upfront licensing fees of [amount] and ongoing royalties of [percentage] on net sales.

This partnership would provide your company with competitive advantages through access to cutting-edge technology while generating new revenue opportunities. We would provide comprehensive technical support, training, and ongoing development to ensure successful implementation and market success.

The licensing agreement would also include provisions for joint development of enhanced versions, shared intellectual property rights for improvements, and coordinated marketing efforts to maximize market penetration.

We have prepared detailed technical documentation, market analysis, and financial projections that demonstrate the compelling business case for this partnership. I would welcome the opportunity to present this information and discuss specific terms that would benefit both organizations.

Could we schedule a technical presentation and business discussion within the next few weeks? I believe this partnership represents a significant opportunity for both companies to achieve accelerated growth and market leadership.

Thank you for your consideration of this technology licensing proposal.

Sincerely,

[Your Name]

[Position]
