

Emotional appeal for coverage of experimental treatment

Subject: Request for Coverage of Experimental Treatment

Dear Appeals Committee,

I am writing to appeal your decision to deny coverage for [Treatment Name], which was deemed experimental. I understand the concern, but I would like to share why this treatment is my only remaining option.

My medical team has exhausted conventional treatments, and this therapy offers hope for improvement. Attached are supporting documents from my physician, including clinical studies showing promising results for my condition.

I ask for compassion in reviewing my request. This treatment could provide me with quality of life and more time with my family. I am hopeful that you will consider this appeal with empathy and urgency.

With gratitude,

[Your Full Name]
