

Experimental Treatment Denial - Research-Based Appeal

Subject: Appeal of Denial for "Experimental" Treatment Designation

Dear Medical Review Board,

I am appealing the denial of coverage for [Treatment Name], which was classified as "experimental" or "investigational" in your denial dated [Date].

Contrary to this designation, [Treatment Name] is recognized as a standard treatment option by major medical organizations including [List Organizations]. The treatment has been FDA-approved since [Year] for [Indication], which directly applies to my diagnosis.

I have compiled extensive documentation demonstrating that this treatment is evidence-based and widely accepted in the medical community:

- FDA approval documentation
- Clinical practice guidelines from [Medical Societies]
- Peer-reviewed studies published in [Journals]
- Success rates and safety data
- Letters from specialists in the field

My condition, [Diagnosis], has not responded to conventional treatments, and my medical team believes this is the most appropriate next step. Several other insurance companies routinely cover this treatment for similar cases.

Denying coverage based on an outdated or inaccurate "experimental" designation contradicts current medical evidence and standard of care. I request that you consult with specialists in [Medical Field] during your review process.

I am prepared to provide additional documentation and facilitate a peer-to-peer review between my physician and your medical director.

Respectfully submitted,

[Your Name]

[Policy Number]

[Date]
