

STEM Scholarship Recommendation

To the Scholarship Committee,

I enthusiastically recommend [Student Name] for [Scholarship Name]. As [his/her/their] research mentor and professor of [Subject] at [University Name], I have directly observed [his/her/their] exceptional aptitude for scientific inquiry and problem-solving over [time period].

[Student Name] joined my laboratory as an undergraduate researcher in [year] and has since made contributions typically expected of graduate students. [He/She/They] mastered complex techniques including [specific methods/equipment] and independently troubleshooted experimental challenges that arose during [project name].

[His/Her/Their] research project investigating [topic] has yielded promising results. [Student Name] designed experiments, analyzed data using [statistical/computational methods], and identified findings with potential implications for [application/field]. We are currently preparing a manuscript for submission to [journal], with [Student Name] as co-first author.

What impresses me most is [Student Name]'s scientific thinking. [He/She/They] doesn't simply follow protocols but understands underlying principles, asks thoughtful questions about methodology, and proposes creative solutions when experiments don't proceed as planned. This intellectual independence is crucial for success in scientific careers.

[Student Name] has presented research at [conferences/symposia] and received [awards/recognition]. [He/She/They] communicates complex scientific concepts clearly to both specialist and general audiences—a skill that will serve [him/her/them] well in any STEM career. Beyond research, [Student Name] maintains a [GPA] in challenging coursework including [specific courses] and volunteers with [STEM outreach program], demonstrating commitment to broadening participation in science.

This scholarship would enable [Student Name] to continue research during [summer/academic year] rather than working outside the field for financial reasons. The continuity would accelerate [his/her/their] development as a scientist and prepare [him/her/them] for graduate study in [field].

[Student Name] represents exactly the kind of talented, motivated student who will advance scientific knowledge. I recommend [him/her/them] with absolute confidence.

Please contact me at [email] or [phone] for any additional information.

Sincerely,

[Your Name]
